MARKING GUIDELINES

MARKS: 300

MARKING PRINCIPLES:

1. Unless otherwise stated in the marking guideline, penalties for foreign items are applied only if the candidate is not losing marks elsewhere in the question for that item (no penalty for misplaced item). No double penalty applied.
2. Penalties for placement or poor presentation (e.g. details) are applied only if the candidate is earning marks on the figures for that item.
3. Full marks for correct answer. If answer incorrect, mark the workings provided.
4. If a pre-adjustment figure is shown as a final figure, allocate the part-mark for the working for that figure (not the method mark for the answer). Note: if figures are stipulated in memo for components of workings, these do not carry the method mark for final answer as well.
5. Unless otherwise indicated, the positive or negative effect of any figure must be considered to award the mark. If no + or – sign or bracket is provided, assume that the figure is positive.
6. Where indicated, part-marks may be awarded to differentiate between differing qualities of answers from candidates.
7. This memorandum is not for public distribution, as certain items might imply incorrect treatment. The adjustments made are due to nuances in certain questions.
8. Where penalties are applied, the marks for that section of the question cannot be a final negative.
9. Where method marks are awarded for operation, the marker must inspect the reasonableness of the answer and at least one part must be correct before awarding the mark.
10. Operation means 'check operation'. 'One part correct' means operation and one part correct. Note: check operation must be +, -, x, ÷, or per memo.
11. In calculations, do not award marks for workings if numerator & denominator are swapped – this also applies to ratios.
12. In awarding method marks, ensure that candidates do not get full marks for any item that is incorrect at least in part. Indicate with a ☒.
13. Be aware of candidates who provide valid alternatives beyond the marking guideline.
14. Codes: f = foreign item; p = placement/presentation.

These marking guidelines consist of 16 pages.

QUESTION 1**1.1 DEBTORS' AGE ANALYSIS****1.1.1 Explain why the debtors' age analysis is considered to be an effective internal control measure. State ONE point.**Valid explanation ✓✓ **part-mark for unclear / incomplete answer**

- Helps identify slow or defaulting debtors (not abiding to the credit terms) so that action can be taken.
- Highlights debtors in good standing so their credit ratings can be reviewed.
- It can expose the problem of allowing debtors to exceed their credit limits.
- It can assist with planning/corrective measures such as sending reminders, writing off debtors etc.

1.3.2 Nomvula has ordered goods with a marked price of R35 000 from Beta Suppliers.

The sales director of Beta Suppliers, Jim Frow, has offered to sell these goods to Nomvula for R15 000, provided that they do not have to issue an invoice.

Comment on the offer made by Jim. State TWO points.

TWO valid points ✓✓ ✓✓ part-mark for unclear / incomplete answer

- Tax evasion / buying stolen goods is illegal / unethical
- The issuing of documents is important for internal control purposes / It is fraudulent not to issue an invoice
- Unethical/illegal activity will tarnish the image of the business.
- Discount limits must be formalised by management (otherwise fraudulent)

Vusi is thinking of purchasing the business premises rather than renting it. State ONE advantage and ONE disadvantage of this option.

Advantage ✓✓ part-mark for unclear / incomplete answer

- Will not have to pay rent in future.
- Business will acquire a fixed asset. This increases the value of the business.
- Extra space can be rented out to receive additional income.

Disadvantage ✓✓ part-mark for unclear / incomplete answer

- Rates on property must be paid.
- Additional maintenance costs will be incurred.
- Large initial cash outlay or an additional monthly instalment, including interest.
- Not easy to relocate quickly
- Costs and time involved in selling a building.

6.3.2

Vusi offers a free delivery service of spare parts to customers, but plans to discontinue this service on 31 March 2018.

State TWO points to support this decision.

Any TWO relevant points: ✓✓ ✓✓ part-marks for unclear / incomplete answer

- Customers will be forced to have the spare parts fitted as part of the service offered by the business.
- The business will be saving on the running cost of the delivery vehicle
- The main line of business is the repairing of vehicles – the sale of spare parts supports this
- The profit on sale of spare parts is considerably lower than the fee income for the repair service.

Explain whether Water and electricity has been well controlled, or not.

Comparison figures not necessary but may enhance explanation

This expense has been well-controlled. If the projected amount of R4 500 considered the increase, it would have been R5 175. Only R5 000 was spent (R175 less than the adjusted projected amount).

OR

The projected amount (R4 500) has not taken in account the tariff increase of 15% affected on 1 February 2018, which would have led to an adjusted projected amount of R5 175.

Comparison figures not necessary but may enhance explanation

The actual amount spent is R2 900 less than the budgeted/projected. / The amount spent (R1 800) is lower than the projected amount (R4 700). This was a poor decision and the full amount should have been used (considering that that mark-up on cost was also adjusted from the projected 65% to 80%).

This had a negative effect on fee income (R22 500 less than projected) and sales of spares (R31 500 less than projected)

Explain whether Consumable stores have been well controlled, or not.

Comparison of fee income and consumable stores ✓✓

Fee income was less than budgeted by R22 500 (15%) whilst servicing expenses was over the budget by R6 450 (21,5%). An actual decrease in fee income should see a proportional decrease in consumable stores used. This indicates a lack of control.

6.4.4

Explain how Vusi's decision about the mark-up percentage on spare parts has affected the business.

Comparison of mark-up% and sales ✓✓

Figures ✓✓

Comparison figures not necessary but may enhance explanation

- The increase in the mark-up percentage (65% to 80%) negatively impacted in spare-part sales.
- Sales was less than projected by R31 500 (R128 700 to R97 200).
- Profit on sales was less than projected by R7 500 (R50 700 to R43 200).
