QUESTION 8

A cylindrical right prism has a radius of r cm and a height of h cm. The dimensions are restricted in such a way that the sum of the circumference of its base and its height is always equal to 21 cm.

The following formulae may be used:

Volume of a Cylinder = $\pi r^2 h$

Total Surface Area of a Cylinder = $2\pi r^2 + 2\pi r h$

8.1 Show that the height of the cylinder can be expressed as:

- 9.2 A gardener is considering a new design for his client's garden. He has a rectangular piece of lawn measuring 5 m by 3 m, and he wants to dig up a part of it to include a flower bed. He draws a plan of the lawn and flower bed on a piece of graph paper, taking the bottom and left-hand edges as the axes, and chooses a scale such that 1 unit along each axis represents 1 metre on the ground.

The equation of the curved edge of the flower bed is given by:

$$y = -x^2 + 2x + 3$$

Calculate the area of the flower bed.
