CONSUMER STUDIES (PRODUCTION OF SOFT FURNISHING PRODUCTS)

GUIDELINES FOR PRACTICAL ASSESSMENT TASKS

GRADE 12

2023

These guidelines consist of 21 pages.

THE PRACTICAL ASSESSMENT TASK FOR CONSUMER STUDIES PRODUCTION OF SOFT FURNISHING PRODUCTS

1. INTRODUCTION

The 18 Curriculum and Assessment Policy Statement subjects which consist of practical components all include a practical assessment task (PAT). These subjects are:

AGRICULTURE: Agricultural Management Practices, Agricultural Technology
 ARTS: Dance Studies, Design, Dramatic Arts, Music, Visual Arts

• SCIENCES: Computer Applications Technology, Information

Technology; Technical Sciences; Technical Mathematics

SERVICES: Consumer Studies, Hospitality Studies, Tourism
 TECHNOLOGY: Civil Technology, Electrical Technology, Mechanical Technology and Engineering Graphics and Design

A practical assessment task (PAT) mark is a compulsory component of the final promotion mark for all candidates offering subjects that have a practical component and counts 25% (100 marks) of the end-of-the-year examination mark. The PAT is conducted up to the end of September. The PAT allows for learners to be assessed on the skills they have acquired during the weekly practical lessons and the practical examinations in Grades 10 to 12. It also allows for the assessment of skills that cannot be assessed in a written format, e.g. test or examination. It is therefore important that schools ensure that all learners complete the practical assessment tasks within the stipulated period to ensure that learners are resulted at the end of the school year. The planning and execution of the PAT differ from subject to subject.

- During the practical assessment task the learner must demonstrate his/her knowledge and practical ability/skills to produce quality products focusing on workmanship and suitability for selling.
- The practical assessment task for Grade 12 Consumer Studies, with the Soft Furnishing practical option, consists of a layout and cutting session and a practical examination of FOUR (4) HOURS.
- Breakdown of the FOUR (4) HOURS:
 - Layout and cutting session ONE-HOUR session (prior to the practical examination)
 - o THREE (3) hours to produce the product
- Learners work individually during the practical examination for the PAT.
- The practical examination for the PAT takes place in Term 3.

2. MARK ALLOCATION

- The total mark allocation of the PAT is 100 marks.
- The marks for the PAT form part of the end-of-the-year assessment in Term 4.
- The province will provide two separate computerised mark sheets, one for SBA and one for the PAT.
- The mark allocation is indicated as follows:

Layout and cutting	6
Practical examination	94
Final mark for PAT	100

3. REQUIREMENTS FOR THE PRACTICAL EXAMINATION

Consumer Studies is an elective subject with five practical options. If the school chooses to offer Consumer Studies as a subject and selects the Soft Furnishings practical option, the equipment and funds necessary to conduct the PAT, as well as the specified number of weekly practical lessons, are the responsibility of the school, as specified in the *CAPS* document on page 10.

The school has the responsibility to ensure the availability of the following for the PAT examination:

- A suitable classroom with the necessary equipment: tables for cutting out; two or more ironing boards and irons; cutting-out scissors (one for each learner); equipment for measuring and marking.
- A minimum of R80 up to a maximum of R150 per learner for the practical examination is required to make the prescribed product, besides the funding required for the SBA weekly practical lessons.
- The number of learners per session must correlate with and align to the number of sewing machines that are available.
- Divide the learners into groups with a maximum of 12 learners per session. Twenty-four learners (two groups of 12 learners each) can perform the examination on the same day, e.g. from 08:00 to 11:00 and from 12:30 to 15:30.
- The teacher will need time between the two sessions to prepare the classroom for the following group.
- Schools with large numbers of learners will need more than one day to complete this practical examination.

4. REQUIRED TIME FRAME

- Layout and cutting is done in a ONE-HOUR session under examination conditions, prior to the practical examination.
- A time frame of THREE (3) hours is required for conducting the practical examination.

5. SETTING THE PRACTICAL EXAMINATION

- The practical examination will take place on a date agreed upon with the moderator.
- The production process, workmanship and saleability of the product are important aspects of the practical examination.
- The teacher must buy a commercial pattern for a product that can be completed in THREE (3) hours.
- Learners should be able to demonstrate all the advanced techniques identified for Grade 12.
- The selected product should have a skills-code weighting of 50 points.
- Learners must complete the ONE-hour layout and cutting session under examination conditions prior to the practical examination.
- The learners will be assessed on the production process, workmanship and saleability of the product.
- At the end of the THREE (3) hours, learners should hand in their products for final assessment.
- After the assessment has been completed, the products must be returned to learners for corrections and finishing off, if necessary.
- The products will NOT be remarked after the corrections have been made.

NOTE: The final product must have a label, and this must be completed before they perform the practical examination. Learners who choose to package their products must bring the packaging on the day of the practical examination.

6. PREPARING FOR THE PRACTICAL EXAMINATION

The teacher is responsible for the following:

- Set the dates for the practical examination. Communicate these dates to the SMT of the school to ensure that the dates do not clash with other school activities.
- All the equipment must be in working order and the sewing machines must be serviced and repaired before the start of the practical examination.
- Copy the pattern, illustration(s) and instruction sheet for each learner or buy a commercial pattern for each learner. It is COMPULSORY for each learner to work from an instruction sheet.
- Prepare the assessment tools provided with the learners' names.
- Prepare name tags for the last group of learners to assist the moderator with the identification of candidates.
- Learners must receive the pattern and instructions **ONE week (7 school days)** prior to the layout and cutting session so that they can prepare.
- Purchase the fabric and haberdashery; cut the fabric to the required size for each learner.
- Make up a 'kit' for each learner and include the following:
 - Fabric in the required size
 - The pattern and instruction sheet
 - The necessary haberdashery, such as a zip, buttons, pins
- Divide learners into groups according to the number of learners that can easily be accommodated in the room.
- Thread all the sewing machines with the appropriate colour thread and test the tension beforehand.
- Prepare the classroom and ensure the availability of the following:
 - Electrical power points and extension cords for all irons and sewing machines
 - Irons and ironing boards
 - Large tables for the layout and cutting out of the pattern pieces
 - Enough small equipment, such as scissors, needles, quick-unpicks, pins, thread, bobbins, extra sewing machine needles and sharp scissors

7. PERFORMING THE PRACTICAL EXAMINATION

7.1 The layout and cutting session: ONE (1) hour prior to the practical examination

- Ensure that learners wash their hands.
- Hand out each learner's 'kit' with the fabric, pattern instruction sheet and haberdashery, such as lace.
- The teacher is NOT allowed to assist the learners in any way during the layout and cutting session.
- During the layout and cutting session, the teacher must allocate marks.
- Learners may improve/correct the cut-out pattern pieces, or cut out new pieces AFTER the cutting session is over and marks have been allocated, but this will NOT be remarked.
- The teacher keeps all the learners' pattern pieces in a safe place until the day of the practical examination.

7.2 Practical examination in Term 3: THREE (3) hours

- When learners enter the classroom, hand out the Soft Furnishing 'kits' to each learner and extra scraps of fabric (to test the sewing machine, should they wish to).
- Enough scissors, pins and needles should be available.
- The sewing machines must be ready at the tables.
- Learners perform the practical examination individually under the supervision of the teacher.
- Only the teacher, the moderator and the learners may be present in the room during the practical examination.
- The teacher must invigilate and assess the learners while they are performing the practical examination and NO other work may be done in this time.
- NO learner may be assisted in any way.
- The product should be ready for assessment after THREE (3) hours.
- Learners will lose **2 marks for every 5 minutes late** up to a maximum of 20 marks.
- The teacher must mark the product that was made during the practical examination and record the marks.
- After the product has been marked, the learners may correct mistakes, make improvements or complete the products.
- The product will NOT be remarked after the corrections have been made.
- After corrections have been made, the products are handed in and stored in a safe place until the day of moderation.
- The teacher must complete the assessment tool.

8. EVALUATION

- The teacher and external moderator have 45 minutes, or more if necessary, to evaluate the final products, inspect the learners' workstations and complete the assessment tool.
- While their products are being evaluated, the learners should clean and tidy their workstations and equipment.
- On completion of the practical examination, the teacher/moderator must inspect the workstations for the final allocation of marks.

9. MODERATION OF THE PRACTICAL EXAMINATION

9.1 BEFORE the practical examination

The teacher must submit the following to the subject advisor for approval by the end of **March or earlier** to ensure that the practical examination is of an appropriate standard:

- The proposed date for external on-site moderation for the last group of learners
- The techniques and skill-code weighting for the selected product
- A photocopy of the pattern envelope
- An instruction sheet
- An illustration of the product
- The list of fabrics, haberdashery, etc. to be purchased
- The completed checklist, checked and signed by the principal

The PAT cannot be done unless it has been approved by the subject advisor.

9.2 ON THE DAY of the practical examination

Consumer Studies

- The teacher must have the following available for the moderator:
 - All the products that learners made during the weekly practical lessons for SBA (if not moderated during SBA moderation)
 - A copy of the completed assessment tool for weekly practical lessons
 - The completed products (marked) of all the learners who have already completed the practical examination
 - The marks of all learners who have already completed the practical examination
 - A separate set of assessment tools for the moderator to use, with the names of the learners already written on the assessment tool
- On completion of the assessment and consolidation of marks, the moderator will compare his/her assessment with the assessment of the teacher. If the moderator finds that the marks of the teacher differ more than 10% from his/her marks, a block adjustment upwards or downwards should be made based on the difference.

The table below illustrates how to determine the difference between the moderator's marks and teacher's marks to establish whether adjustment is needed and also the margin of adjustment required.

PAT		AT
	10	00
Learners' Names	*T	*M
Learner A	84	69
Learner B	83	70
Learner C	68	53
Learner D	59	44
Learner E	49	40
Learner F	45	40
TOTAL	388	316
VERAGE MARK = TOTAL ÷ 6 (number of learners) 66 53		
DIFFERENCE = 66 (*T) - 53 (*M)	13	
ADJUSTMENT DOWNWARDS ✓ UPWARDS	- 3	

*T = Teacher: *M = Moderator

- A block adjustment can also be made based on the professional judgement of the moderator, if the practical examination of the school is not of the expected standard.
- The moderator will discuss the outcome and any adjustments with the teacher.
- The final moderated marks should then be entered on the computerised mark sheet.
- The marks of all learners will be affected if an adjustment is made.

DBE/PAT 2023

SKILLS-CODE WEIGHTING OF TECHNIQUES USED IN SOFT FURNISHING PRODUCTION

- Use the following skills-code weighting to choose a pattern for the PAT as well as for the weekly practical lessons.
- The skills code indicates the weighting for the techniques and NOT the mark allocation.
- The weighting for a specific technique should only be allocated ONCE.

Consumer Studies

- The teacher could add a technique not listed below, after discussing it with the subject advisor. The teacher and the subject advisor should then decide on the weighting for the new technique.
- A weighting is allocated to a technique according to the degree of difficulty of the technique.
- The total weighting for the techniques in the pattern chosen for the practical examination in grade 12 should add up to a minimum of 50 points.

Layout and cut from commercial pattern	15	Patchwork design	10
 Fabric folded correctly Pattern placed on straight grain of fabric All relevant pattern pieces placed on fold Pattern pieces placed economically Pattern pieces pinned correctly to fabric Straight cutting on cutting lines Notches cut accurately Pattern markings Follow pattern instructions 	1 2 2 2 1 2 1 2 2 2 2 2 1 2 2 2 2 2 2 2	 Design drawn on paper Design matches fabric and product Degree of difficulty (number/shape of patches) 	3 3 4

TEMPLATES

REQUIREMENTS:

- 50 cm of 112 cm-wide plain magenta cotton fabric for the back
- 50 cm of 112 cm-wide plain magenta cotton fabric
- 50 x 15 cm rectangle of floral fabric (pink)
- 50 x 25 cm contrasting floral fabric (blue)
- 30 cm invisible zipper (plastic/nylon coil)
- Matching sewing thread
- 40 cm square cushion pad (batting)
- Zipper foot
- Unpicker

LAYOUT AND CUTTING:

- Sixteen 6,2 cm squares of the plain magenta fabric for the small squares (use Template B).
- Sixteen 6,2 cm squares of the (pink) floral fabric for the small squares (use Template B).
- Eight 11,2 cm squares of (blue) floral fabric for the large squares (use Template A).
- Two 41,2 cm x 29 cm rectangles of the plain magenta fabric for the back.

CUSHION

MAKING THE CUSHION:

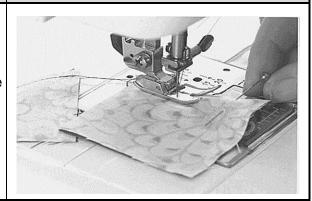

PRACTICAL EXAMINATION: 3 HOURS

INSTRUCTIONS

ILLUSTRATIONS

STEP 1:

- Pin each plain magenta square to a (pink) floral square along one edge, right sides facing.
- Taking a 0,5 cm seam allowance, chain piece the squares, removing the pins as you stitch.

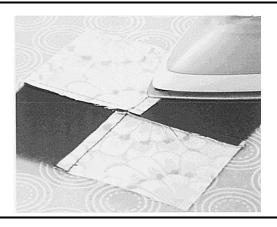

STEP 2:

- Snip the pairs apart and press the seam allowance toward the plain magenta squares on all the pairs.
- You will have 16 pairs, which you will use to create the four separate double four-patch blocks.

STEP 3:

- Pin and stitch two pairs of small squares together, right sides facing and taking 6 mm seam allowances.
- Repeat to create eight sets of checkerboard squares.
- Press the new seam allowances to either the right or the left.

STEP 4:

 Pin and stitch each set of checkerboard squares to a large (blue) floral square, right sides together and taking 0,5 cm seams.
 (If your fabric design is directional, check that four of the large squares are above the checkerboards and four are below.)

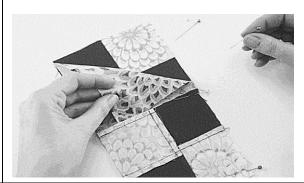

STEP 5:

- You will now have two halves of each double four-patch block.
- Press the new seam allowances so that they will fall in alternate directions (up and down) when the final seam of each block is joined.

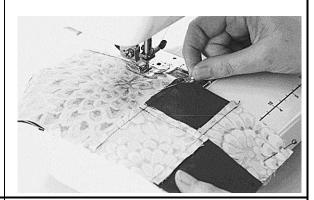

STEP 6:

- Place the halves together so that the corners of two adjacent plain magenta squares and two large squares meet at the centre of the seam.
- Pin, starting at the centre of the seam, then at each corner.

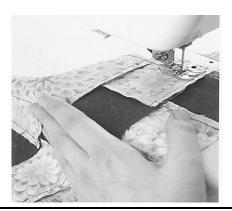

STEP 7:

- Stitch the seams, taking 0,5 cm seam allowance and removing the pins as you stitch.
- Repeat, to create four double four-patch blocks.

STEP 8:

- Lay out all four blocks out so that each one is a mirror image of the adjacent block.
- Pin (from the centre) and stitch them together in pairs again, right sides facing and taking a 6 mm seam allowance.

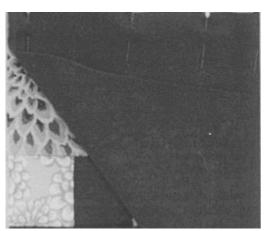

STEP 9:

- Press the two new seam allowances so that they will lie in opposite directions to each
- Pin the paired blocks to each other from the centre, right sides facing.
- Stitch, taking a 0,5 cm seam allowance.
- Press flat.

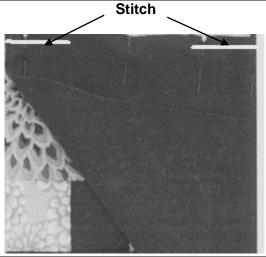

STEP 10:

With right sides facing, pin the plain fabric back to the patchwork front, matching the raw edges.

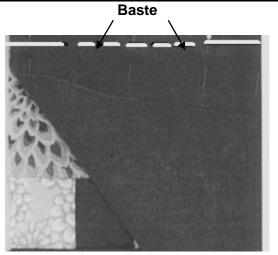

STEP 11:

- Mark 5 cm from either end on one side of the square. The zip will be sewn between the two marks.
- Starting at the ends, sew along to the marks with 12 mm seam allowance.
- Backstitch at the ends and marks to hold it securely.

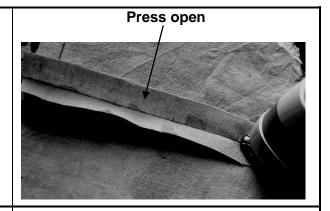

STEP 12:

Baste between the two marks (temporary stitches).

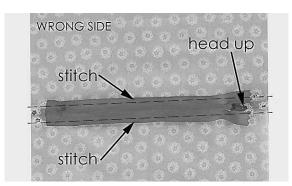

STEP 13:

- Press open the seam.
- Place the pieces wrong side up.

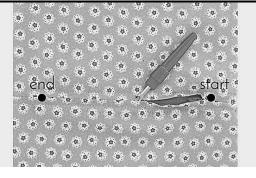

STEP 14:

- Place the zip WRONG way up (face down) over the basted section.
- Hold the zip in place with pins and baste.
- Using a zipper foot, stitch along the edges of the zipper all the way to the end of the fabric.

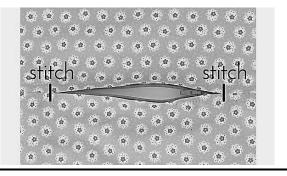

STEP 15:

- Flip the cushion cover over to the RIGHT SIDE.
- Remove the basting threads covering the zip.

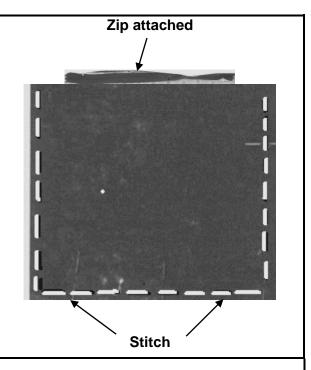

STEP 16:

 Unzip the zip at least halfway and stitch across the ends of the zip next to where the teeth finish. (Be careful not to hit any metal underneath.)

STEP 17:

- Fold the fabric in half with RIGHT sides together.
- Stitch around the outside edge of the cushion, taking 0,5 cm seams.
- Clip the corners, press and turn right sides out, using a knitting needle or blunt pencil to poke out the corners.

STEP 18:

- Insert the cushion pad.
- · Package and label the product.

If the teacher uses a home-made pattern, an instruction sheet must be included.

10. CONCLUSION

On completion of the practical assessment task, learners should be able to demonstrate their understanding of the industry, enhance their knowledge, skills, values and reasoning abilities as well as establish connections to life outside the classroom and address real-world challenges. The PAT furthermore develops learners' life skills and provides opportunities for learners to engage in their own learning.
