## MARKING GUIDELINES

### ACCOUNTING (PAPER 1)

**12 pages**

#### **MARKING PRINCIPLES:**

1. Unless otherwise stated in the marking guidelines, penalties for foreign items are applied only if the candidate is not losing marks elsewhere in the question for that item (no penalty for misplaced item). No double penalty applied.
2. Penalties for placement or poor presentation (e.g. details) are applied only if the candidate is earning marks on the figures for that item.
3. Unless otherwise stated, give full marks for correct answer. If answer is incorrect, mark workings.
4. If a pre-adjustment figure is shown as a final figure, allocate the part-mark for the working for that figure (not the method mark for the answer). Note: if figures are stipulated in memo for components of workings, these do not carry the method mark for final answer as well.
5. Unless otherwise indicated, the positive or negative effect of any figure must be considered to award the mark. If no + or – sign or bracket is provided, assume that the figure is positive.
6. Where indicated, part-marks may be awarded to differentiate between differing qualities of answers from candidates.
7. If candidates provide more than the required number of responses, inspect all responses to give benefit to the candidate. Penalties may be applied for foreign entries if candidates earn full marks on a question (max. -2 per Q).
8. Where penalties are applied, the marks for that section of the question cannot be a final negative.
9. Where method marks are awarded for operation, marker must inspect reasonableness of the answer.
10. Operation means 'check operation'. 'One part correct' means operation and one part correct. Note: check operation must be +, -, x, ÷, or per memo.
11. In calculations, do not award marks for workings if numerator & denominator are swapped – this also applies to ratios.
12. In awarding method marks, ensure that candidates do not get full marks for any item that is incorrect at least in part. Indicate with a ☒.
13. Be aware of candidates who provide valid alternatives beyond the marking guideline. Note that one comment could contain different aspects.
14. Codes: f = foreign item; p = placement/presentation.

## QUESTION 3

3.1.1

Explain why the liquidity of Lemi Ltd. are better than those of Dobi Ltd. Quote THREE financial indicators to support your answer.

Quoting of indicator ✓ ✓ ✓      Figures of Lemi ✓ ✓ ✓      Comparison ✓ ✓ ✓

- **Current ratio** of Lemi is 1,9 : 1 (and of Dobi is 5,7:1). Lemi has enough current assets to cover its current liabilities whereas Dobi Ltd is holding too much of his funds in the form of current assets which may not result in a return for the business.
- **Acid-test ratio** of Lemi is 0,9 : 1 (compared to Dobi's of 3,5 : 1). Even if Lemi is not able to sell all of its trading stock they should still be able to cover the short term debt. Dobi is holding much of its current assets in the form of trading stock (stock piling).
- **Period for which enough stock is on hand** for Lemi is 60 days (and for Dobi it is double (120 days/4 months)). Lemi has enough stock for 2 months which is sufficient. Dobi is holding stock for too long, stock can become obsolete, or even a risk of theft.
- **Debtors are paying** Lemi Ltd. much sooner than the debtors of Dobi is paying them. Debtors' collection period (for Dobi is 59 days) whereas Lemi is collecting from their debtors within 26 days.

9

3.1.2

Which company uses more loans? In each case, quote a financial indicator to support your answer.

Lemi Ltd. ✓

Debt/equity ratio ✓      2,1 : 1 ✓

Explain whether this is a good idea or not. Quote a financial indicator to support your answer.

It is not a good idea. ✓

Return on Capital Employed (ROTCE) ✓ for Lemi is 9,4% which means that the return he is earning is lower than the interest he is paying on the loan, 10,5%/(negative gearing) ✓

6

3.1.3

The market price of the shares of Dobi Ltd. is doing much better than that of Lemi Ltd. Explain, quoting TWO financial indicators to support the opinion.

Comparing market price and NAV of Dobi ✓✓

Comparing market price and NAV of Lemi ✓✓

Market price of Dobi Ltd. is 905 cents which is higher than the Net Asset Value (NAV) of 755 cents OR market price is 150 cents higher than the Net Asset Value. Dobi Ltd. is thus able to fetch a price higher than the value of the shares in the books of the company.

Market price of Lemi Ltd. is 740 cents which is lower than the Net Asset Value (NAV) of 775 cents OR market price is 35 cents lower than the Net Asset Value (NAV).

Response for one mark only

The market price of Dobi is 905 cents compared to Lemi's market price of 740 cents/The market price of Dobi is 165 cents higher than that of Lemi.

4

3.1.4

Dobi Ltd has a better percentage return, earnings, and dividends than Lemi Ltd. Explain, by quoting THREE financial indicators to support this opinion

Financial indicator	✓	✓	✓	Figures	✓	✓	✓
---------------------	---	---	---	---------	---	---	---

Explanation	✓	✓	✓
-------------	---	---	---

- % returns on capital of Dobi is higher (9,5%) than that of Lemi (5,5%) and it is higher than the interest rate on fixed deposit of 6,8%
- EPS for Dobi is 720 cents whereas Lemi is only earning 179 cents per share./EPS of Dobi is 541 cents higher than that of Lemi.
- DPS for Dobi is 650 cents whereas for Lemi it is only 182 cents per share./DPS for Dobi is 468 cents higher than that of Lemi.

OR

For six marks (Two marks per yield per company, two marks for explanation)

- The dividend yield of Dobi is 90,2% compared to Lemi's of 101%. Although Lemi's is higher, it means that retained income is used to pay for dividends and this will have a negative impact on future growth of the company.

OR

Dobi's earnings per share = 720 and dividends per share 650. Retained 70 cent/share in business for capital growth. Lemi earnings per share = 179 and dividends per share 182. Retained income is used to pay for dividends and this will have a negative impact on future growth of company.  
(3 cent/share more dividends than earnings per share.)

(PAPER 1)****GR12 0623**

4.5 Briefly explain why it is important for a company to include non-executive as well as executive directors on the board of directors.

✓ ✓ **one mark each**

- Executive directors are involved with internal functioning (operations) of the company/hands-on/decisions may be based on a narrow view.
- Non-executive directors have a wider perspective of the business environment, and act in the best interest of the company.
- The non-executive directors would exercise a watch-dog role; keep executive directors in check.
- More regular inputs than an internal auditor or other directors.
- Their inputs should be unbiased and independent.
- They share accountability with the other directors/more people have the interests of the company in mind.
- Executive directors would be more vigilant and professional in their duties/not tempted to engage in unethical activities.
- The more directors there are, the more opinions will be generated, which could benefit the company.
- The non-executive directors can be paid less than the other directors (because they do not work permanently in the company).
