**JUNE EXAMINATION
JUNIE EKSAMEN
GRADE/GRAAD 12**

2023

**MARKING GUIDELINES/
*NASIENRIGLYNE***

**MATHEMATICS/
*WISKUNDE***

(PAPER/VRAESTEL 1)

16 pages/bladsye

**MARKING GUIDELINES/
NASIENRIGLYNE****MATHEMATICS/WISKUNDE
(PAPER/VRAESTEL 1)****GR12 0623****AMENDMENT TO MARKING GUIDELINES****JUNE 2023 PROVINCIAL COMMON EXAMINATION**

ATTENTION
THE CHIEF INVIGILATOR

SUBJECT / VAK	MATHEMATICS / WISKUNDE
PAPER / VRAESTEL	1
DATE OF EXAMINATION	9 JUNE / JUNIE 2023

The errata for the Marking Guidelines of MATHEMATICS P1 has reference.

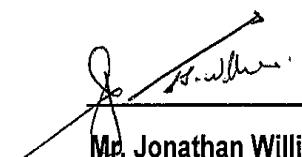

There was an typographical error in **Question 3.2** on both the English and Afrikaans versions of the question paper. This matter was addressed at the Marking Standardisation Meeting.

To ensure that candidates are not disadvantaged and prejudiced in way, you are advised to please ask your Mathematics Educator to **ignore 3.3.2** when marking.

In other words, the paper must be marked out of a total of 115 instead of 120 and then the learners' marks must be converted to a mark out of 150. E.g., Should a learner attain 85/115 then that mark is recalculated as 110/150.

Use the formula: $\frac{a}{115} \times 100 = b$. Then, $\frac{b}{100} \times 150 = c$

*C is the mark that is entered into SASAMS **out of 150**.*

Mr. Jonathan Williams

DIRECTOR: EXAMINATIONS MANAGEMENT
9 JUNE 2023

**MARKING GUIDELINES/
NASIENRIGLYNE****MATHEMATICS/WISKUNDE
(PAPER/VRAESTEL 1)****GR12 0623****NOTE:**

- If a candidate answers a question TWICE, only mark the FIRST attempt.
- If a candidate has crossed out an attempt of a question and has not redone the question, mark the crossed out version.
- Consistent accuracy applies in ALL aspects of the marking guidelines. Stop marking at the second calculation error.
- Assuming answers/values in order to solve a problem is NOT acceptable.

LET WEL:

- *As 'n kandidaat 'n vraag TWEE KEER beantwoord, sien slegs die EERSTE poging na.*
- *As 'n kandidaat 'n antwoord van 'n vraag doodtrek en nie oordoen nie, sien die doodgetrekte poging na.*
- *Volgehoue akkuraatheid word in ALLE aspekte van die nasienriglyne toegepas. Hou op nasien by die tweede berekeningsfout.*
- *Aannames van antwoorde/waardes om 'n probleem op te los, word NIE toegelaat nie.*
