MARKING GUIDELINES

MARKS: 80

These marking guidelines consist of 10 pages.

INSTRUCTIONS TO MARKERS

1. Candidates are required to answer ALL the questions.
2. These marking guidelines have been finalised at a marking guideline discussion session at DBE at which provinces were represented. Any omissions or queries should be referred to Chief Markers/Internal Moderators at marking centres. All protocol must be followed.
3. Candidates' responses should be assessed as objectively as possible.

MARKING THE COMPREHENSION

- Because the focus is on understanding, incorrect spelling and language errors in responses should not be penalised unless such errors change the meaning/understanding. (Errors must still be indicated.)
- If a candidate uses words from a language other than the one being examined, disregard those words, and if the answer still makes sense, do not penalise. However, if a word from another language is used in a text and required in an answer, this will be acceptable.
- For **open-ended questions**, no marks should be awarded for YES/NO or I AGREE/I DISAGREE. The reason/substantiation/motivation is what should be considered.
- When one-word answers are required and the candidate gives a whole sentence, mark correct **provided that** the correct word is underlined/highlighted.
- When two/three facts/points are required and a range is given, mark **only** the first two/three.
- Accept dialectal variations.
- For multiple-choice questions, accept BOTH the letter corresponding with the correct answer AND/OR the answer written out in full.

- 1.8 Open-ended. Accept a suitable answer, e.g.

Yes.

The manufacturing process results in water pollution and the amount of water used leads to the exhaustion of valuable resources. The pollution caused by dumping and overconsumption is devastating as rubbish dumps will be filled. If consumers do not change their behaviour as soon as possible, it will be too late to save the environment as the problem will escalate and resources will disappear.

OR**No.**

There are other factors that have a more devastating impact. The environmental impact of the fashion industry provides no immediate threat to humans. The fashion industry provides employment which contributes to the economy and thus outweighs any possible negative impact.

NOTE: Accept other suitable answers. A candidate can score 1 mark for an answer that is not well substantiated. Accept a combination answer.

(2)

- 1.9 Open-ended. Accept a suitable answer, e.g.

The title is suitable because it is linked to the passage that discusses the negative effects of fast fashion on the environment. Footprints are what one leaves behind. According to the passage, fashion manufacturing leaves both negative and positive footprints.

OR

The title is not suitable because it could be misunderstood if one reads it out of context. It could also be difficult to understand how fashion could possibly leave a 'footprint'.

The pie graphs do not convey a relevant message. Not everyone can easily analyse pie graphs/charts. Written words would have conveyed the information more effectively.
