- 1.4 1.4.1 Amylase/Ptyalin ✓
 - 1.4.2 Cafeteria style/Free choice/Ad lib✓
 - 1.4.3 Foot and Mouth Disease/FMD ✓
 - 1.4.4 Mummification ✓
 - 1.4.5 Colostrum/Beestings ✓

 (5×1) (5)

(2)

TOTAL SECTION A: 45

SECTION B

QUESTION 2: ANIMAL NUTRITION

The digestive system of a ruminant

2.1.1 The name of the animal

Cattle/sheep/goat ✓ (1)

2.1.2 **Processes illustrated by arrows**

- A Swallowing/peristalsis/ingestion/intake of food ✓
- **B** Regurgitation/retro-peristalsis ✓
- C Re-swallowing/peristalsis ✓ (3)

2.1.3 TWO advantages of regurgitation/retro-peristalsis

- Breaks down food into finer particles ✓
- Increases surface area ✓
- Stimulates secretion of saliva ✓
- Maintains rumen pH level ✓
- Improves the mixing of food ✓
- Helps with the forming of bolus ✓ (Any 2) (2)

2.2 The schematic representation of the components of feed:

2.2.1 Identification of substances

- A Dry matter ✓
- **B** Inorganic matter/minerals/elements ✓
- C Vitamins ✓ (3)

2.2.2 Difference between oil and fat

Oil – unsaturated/liquid at room temperature/plant origin/ Double bonds ✓

Fat -- saturated/solid at room temperature/animal origin/ Single bonds ✓ SA EXAM PAPERS

|-----|-------------------------|-----------------------|
| 498 | MARKING GUIDELINES | AGRICULTURAL SCIENCES |
| | MARKING GOIDELINES | (PAPER 1) GR12 0625 |

2.2.3 The end-products of digestion in pigs

- (a) Carbohydrates Glucose/energy ✓ (1)
- (b) **Protein** Amino acids ✓ (1)

2.2.4 Two functions of water in digestion

- Acts as a solvent/assists in the absorption of nutrients ✓
- Moisturises the swallowed food ✓
- Provides a suitable environment for micro-organisms ✓
- Helps with the breaking down of food ✓
- Prevents constipation √
- Transports nutrients ✓
- Facilitates the excretion of waste products ✓ (Any 2)

2.3 Minerals, vitamins and their deficiency symptoms

2.3.1 Missing information in A, B and C

- A Zinc/Zn ✓
- **B** Metritis/inflammation of the udder ✓
- **C** Stiff lamb/muscle dystrophy/white muscle ✓ (3)

2.3.2 Methods used to supplement the following

- (a) **Vitamin A** Injections/supplementary rations ✓ (1)
- (b) **Soluble minerals** Dissolve minerals in drinking water/dosing ✓ (1)

MARKING GUIDELINES AGRICULTURAL SCIENCES
(PAPER 1)

GR12 0625

2.4 Calculation of digestibility co-efficient

2.4.1 DM of hay =
$$\frac{8 \times 30}{100}$$

$$= 2.4 \text{ kg}$$

 $30 - 2.4$

$$= 27,6 \text{ kg} \checkmark$$

$$= \frac{27,6 \text{ kg} - 12 \text{ kg x } 100}{27,6 \text{ kg}} \checkmark$$

$$= 56,52 \checkmark \% \checkmark \text{ or } 57 \checkmark \% \checkmark \tag{5}$$

2.4.2 56,52% ✓ of feed has been digested and absorbed ✓

2.5 Nutritive ratio

2.5.1 The percentage of digestible non-nitrogenous substances

$$75\% - 20\% \checkmark = 55\% \checkmark \tag{2}$$

2.5.2 **Calculation of the nutritive ratio**

or

20%

$$= 1: 2,75 \checkmark OR 1:3 \checkmark$$
 (3)

2.6 Fodder flow plan

Calculation of feed required for a year

15 x 30 animals x 30 days x 6 months ✓ = 81 000 kg ✓

81 000 kg + 108 000 kg = 189 000 kg \(\times \)

QUESTION 3: ANIMAL PRODUCTION, PROTECTION AND CONTROL

3.1 **Farming systems**

3.1.1 Identification of production system

Semi intensive system /Backyard/free-range ✓ (1)

3.1.2 Two advantages of the production system

- Less expensive/cheaper ✓
- Easy to manage ✓
- No special equipment needed ✓
- No specialised/expert knowledge needed ✓
- More environmentally friendly ✓/ Improved Animal welfare (Any 2) (2)

3.1.3 Two problems associated with the production system

- Easy to contract diseases ✓
- Poor feeding/feeding on less nutritious food ✓
- High risk for predators ✓
- More feed energy is utilised for non-production purpose/low production output/slow growth rate √
- High risk towards theft of animals ✓

(1)

3.2 Equipment used in handling farm animals

| 3.2.1 | B/E ✓ | (1) |
|-------|-------|-----|
| 3.2.2 | B/C ✓ | (1) |
| 3.2.3 | B/D ✓ | (1) |

3.2.4 A ✓

| | SA EXAM This Pape | r was download | ed from SAEXAMPAI | PERS |
|-----|-------------------|----------------|-------------------|--------------------|
| 786 | MARKING GU | IDELINES | AGRICULTURAL | SCIENCES GR12 0625 |
| | | | (PAPER 1) | GR 12 0625 |

3.3 Identification of the handling equipment

3.3.1 **Diagram A**

Rope ✓

Diagram B

Nose holder√ (2)

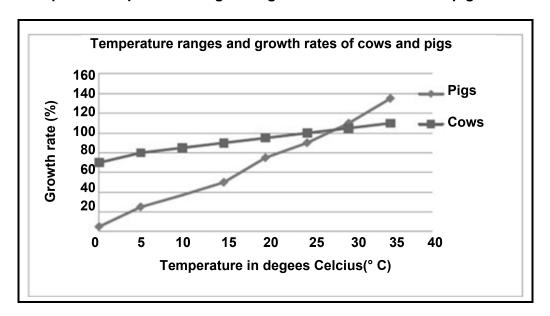

3.3.2 One of the purposes of the equipment in Diagram A

Handled to make it to lie down/bring the animal down ✓ (1)

3.3.3 Part of the head that is used to grip the animal

- Nostril ✓
- Ear ✓ (Any 1) (1)
- 3.4 The temperature ranges in farm animals and their expected growth rates, expressed as averages for their population.

3.4.1 Graph on Temperature range and growth rates of cows and pigs

Rubric for marking of the graph

| Criteria | Yes: (1 mark) | No: (0 marks) |
|---------------------------------|---------------|---------------|
| 1 Line graph | 1 ✓ | |
| 2 X-axis correctly labelled | 1 ✓ | |
| 3 Y-axis correctly labelled | 1 ✓ | |
| 4 Plotting growth rate for pigs | 1 ✓ | |
| 5 Plotting growth rate for cows | 1 ✓ | |
| 6 Correct heading | 1 ✓ | |

| | This Paper was download | AGRICULTURAL SCIENCES | | |
|---|-------------------------|-----------------------|-----------|--|
| Ľ | MARKING GUIDELINES | (PAPER 1) | GR12 0625 | |

3.4.2 Farm animals that require more environmental control

Pigs ✓

Justification

They are most affected by lower temperatures (lower growth rate at lower temperatures) ✓

3.5 Diseases affecting farm animals

- A Bacteria ✓
- **B** Blisters on the tongue, nose, lips, in the mouth and between the toes ✓
- **C** Protozoan ✓
- **D** Bont tick ✓

E − Ringworm ✓ (5)

3.6 The diagram indicating various stages of the life cycle of a parasite

3.6.1 Name of parasite

Bont tick ✓

Type of parasite

External parasite/ecto-parasite ✓ (2)

3.6.2 Classification of parasites

Three-host tick ✓ (1)

3.6.3 Two economic implications

- Banning of exports/decrease in trade ✓
- High treatment/medication costs to control/prevent diseases ✓
- Decreased production ✓
- Loss of income/profit ✓
- Loss of livestock/death ✓ (Any 2) (2)

3.7 Salt poisoning

3.7.1 Two symptoms of salt poisoning

- Excessive salivation ✓
- Increased thirst ✓
- Vomiting and regurgitation ✓
- Constipation ✓
- Aggressiveness ✓
- Hypersensitivity ✓
- Red and dry mucous membranes of mouth ✓
- Increased urination and defecation ✓
- Abnormal pain and diarrhoea ✓ (Any 2) (2)

3.7.2 Two measures to treat animals with salt poisoning

- Provision of fresh, clean water in small amounts ✓
- Provision of isotonic saline solution/hypertonic dextrose ✓
- Remove source of salt poisoning ✓ (Any 2) (2)
 [35]

(2)

QUESTION 4: ANIMAL REPRODUCTION

| 4.1 | Female | reproductive | organs |
|-----|--------|--------------|--------|
| | | | |

| 4.1.1 | Identification | of the parts | of the reprodu | ıctive system |
|-------|----------------|--------------|----------------|---------------|
|-------|----------------|--------------|----------------|---------------|

- **A** uterine horn ✓
- C fallopian tube/oviduct ✓
- **E** cervix ✓

4.1.2 Parts linking with the following functions:

- (a) Serves as the birth canal F ✓ (1)
- (b) Site of fertilisation C ✓ (1)
- (c) Organ not directly involved in reproduction − I ✓ (1)
- (d) Deposition of semen during artificial insemination J ✓ (1)

4.2 Infertility and sterility in bulls

4.2.1 Differentiation between infertility and sterility

- **Sterility** is the total loss of fertility ✓
- Infertility is the temporary loss of fertility ✓ (2)

4.2.2 TWO congenital defects that lead to sterility

- Hypoplasia ✓
- Cryptorchidism ✓
- Hermaphroditism ✓
- Sperm defects ✓ (Any 2) (2)

4.2.3 TWO conditions that may cause a bull to be unable to copulate

- Injuries to the penis ✓
- Defective penis/corkscrew/too short ✓
- Poorly developed hind legs ✓
- Diseases causing inflammation of the joints ✓ (Any 2) (2)

| This Paper was downloa | ded from SAEXAMPAPER | RS |
|------------------------|-----------------------------|----------------------|
| MARKING GUIDELINES | AGRICULTURAL S (PAPER 1) | CIENCES GR12 0625 |

4.3 The diagram that illustrates a technique used in animal reproduction

4.3.1 Process illustrated by the diagram

Nuclear transfer/cloning ✓ (1)

4.3.2 Identification of cells

A – Recipient cell with nucleus/egg cell/ovum ✓

B - The nucleus of the donor cell ✓

D – The fused cell \checkmark (3)

4.3.3 Two types of the process

- Reproductive cloning ✓
- Therapeutic cloning ✓ (2)

4.4 Difficulty in giving birth

4.4.1 Scientific term for difficult births

Dystocia ✓ (1)

4.4.2 Three reasons for difficult births in heifers

- Heifers are physically smaller ✓ and less developed (younger)/age ✓
- Incorrect presentation/position/posture/ Posterior presentation ✓
- Too large foetus/hydrocephalus ✓
- Deformities of the foetus ✓
- Torsion/twisting of the foetus ✓
- Prolapsed uterus ✓
- Multiple births/twins ✓
- Size of pelvic area ✓
- Weak/ ineffective labour ✓
- Cervix failing to dilate ✓
- Prolonged gestation/pregnancy period ✓
- Malnutrition ✓
- Diseases ✓ (Any 3) (3)

4.4.3 TWO managerial measures to reduce difficult births

- Use bulls renowned for small calves/low birth weight ✓
- Mate heifers at the ideal age/mass/not too early ✓
- Use a controlled/well-planned breeding season ✓
- Well planned feeding programme/avoid overfeeding ✓
- Planned health programme √ (Any 2) (2)

4.4.4 **Definition of placenta retention**

- The failure to expel the placenta/membranes ✓
- within 12 hours after parturition/birth ✓
- with negative effects/complications ✓ (Any 2) (2)

S GAUTENG PROVINCE

|-----|---------------------------------|---------------------------------|---------|
| 286 | MARKING GUIDELINES | AGRICULTURAL SCIENCES (PAPER 1) | 12 0625 |
| | | (1711 = 171) | |

4.5 **Normal lactation**

| 4.5.1 | Identification | of | the | week | when | the | cow | reached | her maximum |
|-------|----------------|----|-----|------|------|-----|-----|---------|-------------|
| | production | | | | | | | | |

Week 8 ✓ (1)

- 4.5.2 **TWO** benefits of the milk produced within the first 3 days of parturition for the calf
 - It provides antibodies to increase the calf's resistance to diseases ✓
 - Supplies nutrients to the calf ✓
 - Necessary for the normal growth, functioning and maturation of the alimentary canal ✓
 - Higher butterfat content ✓ (Any 2) (2)
- 4.5.3 Explanation of the relationship between the percentage of butter fat content and the quantity of milk produced

When milk production reached its maximum during week 8 and decreased until week 42 ✓ butterfat content decreased at week 8 and increased until week 42 ✓

(2)

4.5.4 Period in lactating cow after 42 weeks

Dry period ✓ (1)

4.5.5 Importance of dry period

It gives the glandular tissue of the udder time to recover ✓ (1)

[35]

TOTAL SECTION B: 105

TOTAL: 150
