## INSTRUCTIONS AND INFORMATION

1. This question paper consists of 11 questions. Answer ALL questions in the spaces provided.
2. Show ALL calculations clearly.
3. You may use an approved scientific calculator (non-programmable and non-graphical), unless stated otherwise.
4. Round-off ALL final answers appropriately according to the given context, unless stated otherwise.
5. Indicate units of measurement, where applicable.
6. Diagrams are NOT necessarily **drawn** to scale, unless stated otherwise.  
Show ALL calculations, diagrams, graphs, etc. that you have used in determining your answers.
7. No pages may be torn from this question paper.
8. Candidates may not retain a question paper or remove it from the examination room. Question papers must be returned to the invigilator at the end of the examination session.
9. Answers must be written in black/blue ink as distinctly as possible. Do NOT write in the margins.
10. Indicate the questions you have answered by drawing a circle around the relevant numbers on the front cover of the question paper where marks are to be recorded.
11. Draw a neat line through any work/rough work that must NOT be marked.
12. In the event that you use the additional space provided:
  - 12.1 Write down the number of the question.
  - 12.2 Leave a line and rule off after your answer.
- 13.

**QUESTION 1**

|       |   |     |
|-------|---|-----|
| 1.1   | Given: $f(x) = (x^2 - 3)(3x - 1)(x + 2)$              |     |
|       | Solve $f(x) = 0$ if:                                  |     |
| 1.1.1 | $x$ is an integer                                     |     |

**QUESTION 3**

3.1

The graphic below shows a dartboard from which patterns relevant to the different circles can be derived.

The radii of the largest circle and then moving consecutively to immediate inward circles is given by: 18 cm;  $6\sqrt{3}$  cm; 6 cm ...

The innermost circle has a radius of  $\frac{2}{3}$  cm.

3.1.1

Show that the areas of the circles form a converging geometric sequence.

3.2

Given the series:

$$(1 \times 2) + (5 \times 6) + (9 \times 10) + (13 \times 14) + \dots + (81 \times 82)$$

Write the series in sigma notation. (It is not necessary to calculate the value of the series.)

(4)

3.3

In the series  $a + ar + ar^2 + \dots$  the sum to infinity is 1.

In the series where the terms are the squares of the above series, the sum to infinity is  $\frac{5}{6}$ .

Determine the common ratio.

The following properties of  $f$  are given below:

- Point A(1 ; 0) is a stationary point.
- Point B(4 ; 0) is an  $x$ -intercept.
- Point P is the point of inflection.
- Point C is the turning point.
- Point D is the  $y$ -intercept.

- 11.2 The probability of getting the first answer in a quiz correct, is 0,6. If the first answer is correct, the probability of getting the next answer correct rises to 0,7. However, if the first answer is incorrect, the probability of getting the next answer correct is 0,4. With the use of a tree diagram, determine the probability of getting the second answer correct.
