## INSTRUCTIONS AND INFORMATION

Read the following instructions carefully before answering the questions.

1. This question paper consists of 9 questions. Answer ALL the questions in the spaces provided for answers.
2. Clearly show ALL calculations, diagrams, graphs, etc. that you have used in determining your answers.
3. Answers only will NOT necessarily be awarded full marks.
4. You may use an approved scientific calculator (non-programmable and non-graphical), unless stated otherwise.
5. If necessary, round-off answers to TWO decimal places, unless stated otherwise.
6. Diagrams are NOT necessarily drawn to scale.
7. An INFORMATION SHEET with formulae is included at the end of the question paper.
8. No pages may be torn from the question paper.
9. Candidates may not retain a question paper or remove it from the examination room. Question papers must be returned to the invigilator at the end of the examination session.
10. Answers must be written in black/blue ink as distinctly as possible. DO NOT write in the margins.
11. Indicate the questions that you have answered by drawing a circle around the relevant numbers on the front cover of the question paper where marks are to be recorded.
12. Draw a neat line through any work/rough work that must NOT be marked.
13. In the event that you use the additional space provided:
  - 13.1 Write down the number of the question.
  - 13.2 Leave a line and rule off after your answer.
14. Write neatly and legibly.

|-------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| 3.4   | <p>A metal rod of 15, 9375 metres is cut into eight pieces whose lengths form a geometric sequence. The pieces are then used to support a structure. The pieces are welded vertically, starting with the longest piece, to support two metal beams as shown in the diagram below. The length of the longest piece is 128 times the length of the shortest piece.</p> |     |
|       |                                                                                                                                                                                                                                                                                    |     |

**QUESTION 4**

Given:  $f(x) = \left(\frac{1}{3}\right)^x$

- 4.1 Determine the inverse of graph  $f$  and write your answer in the form  $y = \dots$

(2)

- 4.2 Sketch the graph of  $f$  and  $f^{-1}$ . Show intercept(s) with axes and at least ONE other point on each graph.

(6)

**SA EXAM PAPERS**

Proudly South African

4.3 Determine the values of  $x$  for which  $f^{-1}(x) > -3$ .

(2)

**[10]****QUESTION 5**

The graphs of  $f(x) = -x^2 - 6x + 7$ ,  $g(x) = \frac{1}{2}x - 4$  and  $h(x) = -2x - 14$  are sketched below.

Graph  $f$  cuts the  $x$ -axis at points Q and T. Graphs  $g$  and  $h$  meet at point R.

The  $x$ -intercepts of graphs  $g$  and  $h$  are S and Q respectively. P is the turning point of graph  $f$ .

## QUESTION 6

The graphs of  $f(x) = x^2 - 2x - 15$  and  $g(x) = \frac{a}{x+p} + q$  are sketched below. The asymptotes of graph  $g$  intersect at point  $H(1; -2)$ . Graph  $f$  cuts the  $x$ -axis at points A and B, and intersects the  $y$ -axis at point E. Graphs  $f$  and  $g$  intersect at points B, C and F. The turning point G, of graph  $f$  lies on the vertical asymptote of graph  $g$ .

6.1 Write down the coordinates of point E.

**QUESTION 9**

A school fundraising committee is planning a matric dance for the Grade 12 learners. The weekly profit  $P$ , in rand, depends on the number of teachers involved in the fundraising activities. The relationship between profit and the number of teachers is given by the formula:

$P(x) = -2x^2 + 160x + 19\,600$ , where  $x$  is the number of teachers.

|     |                                                                                                                                                   |     |
|-----|---------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| 9.1 | Determine the profit when 5 teachers are involved in the fundraising.                                                                             | (2) |
|     |                                                                                                                                                   |     |
|     |                                                                                                                                                   |     |
|     |                                                                                                                                                   |     |
|     |                                                                                                                                                   |     |
| 9.2 | Calculate the number of teachers that would need to be involved in the fundraising activities to achieve a maximum profit. Show ALL your working. | (4) |
|     |                                                                                                                                                   |     |
|     |                                                                                                                                                   |     |
|     |                                                                                                                                                   |     |
|     |                                                                                                                                                   |     |
